

TESTIMONY FRIDAY!

Many of our patients we see are participating in the Recovery Program through The Dream Center, Dream Center Disciples (DCD). This program helps to provide hope and help for those struggling with substance abuse, depression, anger control, past physical and sexual abuse and other life-controlling issues.

The latest testimony from one of our DCD patients:

Since 2009 Justin can remember always feeling fatigued and tired. He says he 'neglected the issue,' using weed as a way to escape the problem.

However, now, through regular adjustments by Dr. April and learning ways to improve his health, he's become more energized, with more endurance while working out in the gym.

"I love Maximized Living. Dr. April and her team are awesome. They're very helpful, educational, and are great examples of Christ followers in the work place."

Thanks for sharing your story Justin!
